# Coding Assignment 5

- **Task**: This assignment is about the basics of linear regression. You will need to figure out how to make the algorithm working on our toy data in the python notebook file. You may edit any part of the given codes as you wish, but at the end you are expected to fit the right line just as demonstrated in the figure.

Coding Assignment 5 Submissions

- The first submission (30%) is due on Friday 10th 11.00 AM. We will discuss your submission during the next lecture.
